

Top three fields are from parent record. Record ID is the reference proxy. Other two are lookups.

**Record ID** [161](#)

**Order Number** [999999999](#)

**Name** [Test](#)

IF AN INVENTORY WAS NOT CREATED FOR YOUR MOVE, ENTER 0 IN THE FIELD BELOW.

**Inventory Number**

**Loss Type**

- Damaged
- Missing
- None of the above

**Item Name or Property Damage Location \***

**Make/Model**

**Year Purchased**

**Description of Damage**

**Additional Notes**

**Amount Claimed \***

IF YOUR ITEM IS STILL AVAILABLE FOR PURCHASE, PLEASE PROVIDE A LINK TO IT IN THE FIELD BELOW.

**Replacement  
Link**

**Photo**

**Additional  
Attachment**

**Additional Attachments**

IF YOU HAVE MORE ITEMS TO ADD, USE THE DROP-DOWN MENU ON THE SAVE BUTTON BELOW TO SELECT SAVE AND NEW.

 

USERS CANNOT SEEM TO FOLLOW THE INSTRUCTIONS ABOVE THE NATIVE UI SAVE BUTTON.

I WANTED TO ADD A LARGE OBVIOUS BUTTON TO ADD ANOTHER ITEM. THIS BUTTON NEEDS TO PULL THE TOP THREE FIELDS SO THAT THE NEXT CHILD RECORD STAYS ATTACHED TO THE PARENT RECORD.

SO I CREATED THIS: "<a href="" &

URLRoot() & "db/btcp7sph?a=API\_GenAddRecordForm&dfid=2" &

"&\_fid\_18=" & URLEncode([Related Request]) &

"&\_fid\_20=" & URLEncode([Request - Order Number]) &

"&\_fid\_19=" & URLEncode([Request - Name]) &

">" &

"<img src='https://expertclaimmanagement.quickbase.com/up/btegrvwjr/g/rb/eh/va/ADD%20NEXT%20ITEM.png' alt='Save & New'>" &

"</a>"

The problem is that when I hit that, a warning dialogue box pops up that says Leave Site? Changes you made may not be saved. (I know they will be saved because I have it set up to auto save if the page is navigated away from, but the average EOTI user isn't going to understand that).

To try and solve for that, I created this

```
var text url = URLRoot() & "db/" & Dbid() & "?a=er&rid=" & ToText([Record ID#]);
```

```
var text link = "<a href='" & $url & "' data-replaceRid='true' style='font-size: 11pt;margin-left: 5px; margin-top: 0px; height: 33px; width: 160px; text-align:center;background-color:#13294d;color:white;background-image: linear-gradient(to bottom, #13294d 0%, #13294d 100%);' class='SaveBeforeNavigating Vibrant'>Save and Continue</a>";
```

```
$link
```

But it doesn't work at all how I need.

I need the Save & Close, Save & New and Save & Continue to be three separate buttons at the bottom of the page so that very low tech EOTI user can tell how to exit the page, add a new child record or just save the page they are currently editing.
